

WELCOME TO THE LVMC BLOOD BANK

“SAVING LIVES ONE UNIT AT A TIME”

BLOOD BANK NEWS!

- 1023 TRANSFUSIONS WERE DONE IN 2024 !

Thank you all for a successful 2024. So many lives could not have been saved without your loyalty and the help of your awesome FUR BABIES!

- Construction will begin on our Cat Room, beginning in March 2025. We will be able to house up to 6 cats for use in emergencies and will then place them up for adoption after two years of donor service.

Cold Weather Safety Tips

OUTDOOR CONDITIONS: We don't recommend keeping pets outdoors for long periods of time. However, if you're unable to bring your pet inside during cold weather, make sure you check their water regularly in freezing temps. Ensure their shelter is dry and they have a source of warmth. Dogs and cats are susceptible to frostbite and hypothermia.

WARMING LAYER: If your dog seems affected by the cold weather, purchase a dog sweater for additional comfort. However, if your pet wears it outside, make sure you take it off when you get inside so it can dry. Wet sweaters can make your pet colder.

PAW CHECK: Snowmelt can burn your animal's paws. Make sure you wipe down your pet's feet, legs, and belly as soon as you're back in the house. Also, check your dog's paw for signs of cracked pads or bleeding. Their paws are more susceptible to cold weather and snow accumulation on the hair between their paws.

ASSESS YOUR PET: Think about how the weather is going to affect your pet. You may need to shorten their walks based on your pet's tolerance.
