

## High School Students

To prepare for application to the College of Veterinary Medicine, high school students begin by gaining veterinary experience, taking college prep courses with as much science as possible, maintaining excellent grades, and planning their undergraduate classes in order to complete the prerequisite course work. Students can also benefit by taking on leadership roles in clubs and organizations.

PREREQUISITE COURSES*	SEMESTER HOURS REQUIRED	QUARTER HOURS REQUIRED
English Composition	6 sem cr	9 qtr cr
Oral Communication	3 sem cr	4-5 qtr cr
General Chemistry I + Lab & II	7 sem cr	11-12 qtr cr
Organic Chemistry I + Lab	4 sem cr	6 qtr cr
Biochemistry	3 sem cr	4 qtr cr
Physics I + Lab	4 sem cr	6 qtr cr
General Biology I & II (Organismal and Cellular) + Labs	8 sem cr	12 qtr cr
Genetics	3 sem cr	4-5 qtr cr
Mammalian Anatomy and/or Physiology	3 sem cr	4-5 qtr cr
Arts, Humanities and/or Social Sciences	6 sem cr	9 qtr cr
Electives	8 sem cr	12 qtr cr

\*A bachelor's degree is not required for admission. Please see the website for detailed descriptions of prerequisite courses.

### AP Courses

Advanced placement credit is accepted for required course work provided the AP credit has been accepted by a college or university for credit toward courses equivalent to our requirements. This should be marked on the college or university transcript or a copy of your AP scores should be sent to the w Office of Admissions when you apply to veterinary school. Enrolling in AP courses that are on the prerequisite list is another great way to lessen student debt. Please be sure to check with our admissions office if you're planning on using AP credit for a science prerequisite.

# Frequently Asked Questions

**Q:** How difficult is it to get into the College of Veterinary Medicine?

**A:** While it does take hard work and dedication, it's not impossible to become one of the 159 students who are admitted each year. We typically have between 120 and 150 Iowa residents who apply, with around 55 and 60 in-state students admitted. We also admit between 55 and 60 out-of-state students each year. While we have close to 1,200 qualified applications, our waitlist tends to move quickly since most students apply to multiple veterinary schools.

**Q:** When should I apply to veterinary school?

**A:** Students apply to veterinary school a full calendar year before they wish to start. This typically occurs between the student's junior and senior years in their undergraduate career as the application process is open from mid-May to mid-September. Iowa State's College of Veterinary Medicine does not require a bachelor's degree to be accepted. Students may choose to apply once they have completed or nearly completed the prerequisite coursework.

**Q:** What should my major be?

**A:** At many colleges and universities, pre-veterinary medicine is an option, not a major. Students can work toward a degree in any field that interests them. Our most common degrees are animal science and biology, but we annually admit students with majors in business, fine arts, economics, journalism and many more as long as students have completed prerequisite classes in their coursework. We do not give preference to any undergraduate major when admitting our incoming class.

**Q:** Do my chances of getting into the College of Veterinary Medicine increase if I go to Iowa State for my undergraduate degree?

**A:** No. We do not select our class based on which school a student attends for their undergraduate education. We recommend students find a college or university which best suits their interests and personality. Many colleges and universities, Iowa State University included, have resources for students interested in veterinary medicine including pre-veterinary and pre-health professions clubs. These clubs help students connect with experience opportunities, professionals in their area of interest, and much more. When choosing an undergraduate institution, students should inquire about pre-veterinary resources.

## CLASS 2026 PROFILE

**Q:** I've heard that I need experience to be admitted to veterinary school. When can I start getting that experience?

**A:** Yes, you'll need at least 200 hours of quality experience before you apply to Iowa State's College of Veterinary Medicine. You can start that experience now, even in high school. You should keep a journal or log of those hours including any insight you may have gained from those experiences. While you won't turn in that journal, you will want to refer to it as you enter your experiences on the application.
